

Financials

“ Infor ERP LX will allow us to more effectively manage our global operations to provide our customers with unsurpassed service. ”

KEN ANDRE, VICE PRESIDENT, CORPORATE CONTROLLER AND CIO, GREIF, INC.

Do business better.

To be truly effective, every aspect of your business must support your strategies, from front office to back. Especially when it comes to financial processes, you need the flexibility to explore new opportunities, including growth across multiple sites and multiple countries. That means complying with local tax laws and other requirements on a global basis. Multicurrency and multilingual functionality are essential, as well as having the ability to manage the multiple methods of payment for worldwide customers and vendors. The key is having a single, integrated solution that lets you meet the financial management challenges of global growth with minimum overhead and maximum efficiency.

Leverage experience.

With more than 25 years of experience in integrated financial management for global business, Infor™ is helping companies stay ahead of the competition. Infor ERP LX Financials, a financial management solution that supports the flexible processes you need in today's complex financial environment, lets you maintain customer orders, invoices, and payments in an unlimited number of currencies. It supports multiple currencies for pricing and quotes by item, company, and currency, too. The solution also provides tax processing support for multi-company, global environments.

Get business specific.

With Infor ERP LX Financials, you get a solution that is built and serviced by financial professionals who understand your requirements. Infor ERP LX Financials can help you maintain the delicate balance between positive vendor relations and timely payments with internal optimization of cash flow. Features include:

- **Purchasing (PUR) and Accounts Payable (ACP)**—These functions can be integrated with any procure-to-pay process, an essential step for the evaluation of vendors and top purchasing performance, as well as for the control and administration of requisitions, repetitive supplier schedules, purchase orders, receiving, liabilities and payments.
- **Promotions, Deals and Pricing (PRO), Trade Funds Management (TFM), Accounts Receivable (ACR), Advanced Remittance Processing (ARP), and Credit and Deduction Management**—Integrate all of these processes into a seamless business process that minimizes the order cash cycle and improves cash flow, providing a clear view into the profitability of products and customers.
- **Configurable Ledger (CLD), Enterprise Structures and Consolidations (ENT), and Advanced Budgeting and Analysis (CBA)**—Our solution provides significantly enhanced reporting and analysis of information, separate from the design of the Chart of Accounts. Information from different companies, ledgers, or books can be analyzed without any changes to the underlying general ledger data.
- **Cost Accounting and Control (CST)**—One of the most flexible, fully functional costing systems available today, Infor ERP LX Financials is fully integrated with the ERP LX Supply Chain Management and ERP LX Multi-Mode Manufacturing product suites for accurate, complete breakdown and buildup of product costs and batch costs for purchasing and manufacturing.
- **Draft Management (CSH)**—Our solution includes the payment tools and international functionality required to compete in a global market.
- **Fixed Assets (FXA)**—This feature provides everything you need to manage and control all types of property, plant, and equipment. Recognizing the inevitable changes in depreciation methods, FXA takes a flexible approach to the book and tax accounting implications of capital assets.

See results now.

Infor ERP LX Financials has built-in expertise that reduces the need for customization, speeds implementation time, and delivers return on investment quickly. From the very first day, you'll start to see immediate benefits through:

- Integrated financial processes in a single solution
- Appropriate response to every transaction across the supply chain
- Improved transparency for better decision-making
- Support for exploring global opportunities and efficiencies
- Compliance with tax and financial reporting requirements around the world

It all adds up to quicker time to value with Infor ERP LX Financials. You'll gain clear visibility across your financial organization, no matter how complex your transactions may be.
